

Introducing

Aeroplus Shaker

“Shake up aerosol cans in 20 seconds.”

TARGET MARKET:

- DIY users
- Big box retailers
- Local Boutique Paint
- Hardware Retailers

FEATURES:

- Better clamping process
- Paint can opener included
- Lightweight and user-friendly

PATENT INFORMATION:

Fully patented.

SUMMARY:

The concept Mr. King has envisioned is a device that is designed to shake up aerosol paint cans as well as Zolatone, adhesives, liquid rubber, glue, 2-part epoxies, and more. This multi-use tool will expertly and efficiently shake up aerosol cans in about 20 seconds, and what is even better is that after that initial 20-second shake-up, the whole can of product will be able to be used without having to re-shake it every 10 seconds.

To operate the Aeroplus Shaker simply attach one end to a Sawzall, insert the cans, tighten the clamps, and start the Sawzall. (A variable speed Sawzall will work

best, but the Aeroplus Shaker will work with any Sawzall.) Next, shake up the cans for about 20 seconds and in that short time the paint (or other product) in the cans will be mixed far better than anyone could do by hand. Now it's time to paint or glue and so forth!

The sturdy but light Aeroplus Shaker creates less vibration and allows the user several options in the size of their paint (or other product) can – everything from the very small auto paint cans to quart size paint cans – and two cans can be used at once.

Using Aeroplus Shaker turns big projects into smaller projects, saves time, and reduces wear on the body. Fantastic for those that have a physical impairment that makes it difficult for them to shake cans, and great for DIY projects as well as large-scale contracted projects.

About the Developer

Nathan conceived his invention while trying to fix his truck and painting it with automotive aerosol paints. He contacted the Mars Rising Network and had a provisional and design patent application filed and had the invention designed properly so that he may see success with this great idea and turn it into a real product. He is actively seeking a company that would have an interest in licensing the product for royalty. Working with Mars Rising Network, this essential new design concept was refined and prepared to be presented as a commercial product.
